Healthcare Information Technology – The Cimige Promise

The challenges of the U.S. healthcare system have become even more critical and health systems now have to step up to solve them. Information technology when appropriately applied, will improve business and clinical performance for all healthcare systems. Traditionally, health systems face financial pressures, however today the pressure to improve quality comes with hopes for better reimbursement. These challenges cannot be met without leveraging Cimige health information technology.

Why Cimige Advisory Services?

As a boutique consulting practice, Cimige Advisory Services team specializes in helping clients develop innovative IT-enabled business and clinical solutions that can help you eliminate challenges and significantly enhance practice-wide performance. Our teams of advisors are life science, health care and clinical professionals who have practical experience. So, they help clients determine the most feasible solutions to create and support a safer, higher quality and cost-effective healthcare IT environment. We understand the business-related challenges our client organizations face and will address these challenges in part by utilizing the potential of health-care information technology.

Unique Solutions for Similar Issues – Cimige Solutions

While many of the issues health systems face are universal, Cimige has no one-size-fits-all solution to improve your organization clinical quality, operational performance or bottom line. Cimige approaches advisory consultations based on the notion that each

organizations can gain significantly from the experiences of their Cimige and best practices, but with the understanding that each organization must develop solutions that meet its unique business situation and existing IT infrastructures and capabilities. We offer a group of solutions to help health systems develop strategies for applying information technology solutions to their most critical practice-wide issues:

- *IT Strategic Planning*
- *Clinical IT Strategy*
- *IT Assessments*
- *IT Support Services*
- *Project Management*
- *Disaster Avoidance / Business Continuity*
- *Process Redesign*
- *Process Optimization*
- *System/Vendor Selection Services*
- *Clinical Transformation Services (Paperless)*
- *Organizational Change Management*
- *Information Security Services*
- *Healthcare IT Adoption*
